Last updated: December 3, 2019 Google Fusion Tables and the Fusion Tables API have been discontinued. We want to thank all our users these past nine years. We understand you may not agree with this decision, but we hope you'll find alternatives that are just as useful, including BigQuery, Cloud SQL, Maps Platform, and Data Studio. Frequently Asked Questions What will happen to my Google Fusion Tables data (eg. data you uploaded to tables) will be systematically deleted from Google servers. Will there be any way to retrieve my Fusion Tables data from Google in the future? You'll be able to download your table data via Google Takeout until March 3, 2020. After that, all Fusion Tables data will be permanently and irrevocably deleted. Why was Google Fusion Tables discontinued? Please refer to our blog post for more information. What is a modern general-purpose programming language originally developed by Google (designed by Lars Bak and Kasper Lund). Dart is an open source programming language not only used for developing mobile applications but it is approved as a standard by Ecma and is used to build web, server, desktop, mobile applications and the Internet of Things (IoT) devices. Dart is an object-oriented programming language syntactically similar to C which makes it easy to learn if you prefer C or Java as programming language. This Dart tutorial is comprehensive guide for programming in Dart language, this tutorial introduces you basic to advance Dart programming concepts. Follow it step-by-step, reading the text and running the sample programs. Audience This tutorial is designed for people who want to learn Dart Programming Language starting from scratch. This Dart tutorial is a comprehensive guide on how to get started with Dart Programming. Prerequisites Before starting with this Dart tutorial, adequate knowledge of programming and object oriented programming concepts will be assumed. It's better if you already had exposure to any programming language like C, Java, JavaScript, Kotlin, C#, or Swift.
